Access to information requests have turned up a “secret” Environment Canada report (i.e., one the Harper government didn’t want published last spring) that warns how oil sands development will harm downstream communities and wildlife, suck up and pollute four or five barrels of fresh water for every barrel of oil it produces, and generate GHG gas emissions every year equivalent to all the cars and SUVs on Canadian roads. See report in the Ottawa Citizen by Mike de Souza here Harper government continues to defend the oil sands development and ignores the alarming findings by Enivoronment Canada
